DEFRA (Ref: MO43) For Weather Forecast Planning Issued on Sunday, 11 August 2024 at 05:40 Local time

Air Quality Forecast for the UK

Issued by the Met Office

Today: Fine and warm weather is expected to develop for many parts on Sunday, however a strengthening breeze will help to prevent the build-up of pollutants, keeping air pollution levels Low across the UK.

Tomorrow: Hot and humid weather Monday is expected to result in areas of Moderate air pollution developing for many eastern and some central parts of England. Low levels are expected elsewhere.

Outlook: Fresher weather, spreading east across the UK Tuesday and Wednesday, will result in air pollution levels falling to Low for all parts. These Low levels then persisting Thursday.
